PROFESSIONAL SUMMARY

Results-driven Data Scientist and Machine Learning Engineer with a proven track record of architecting scalable predictive models and data-centric strategies. Expertise spans generative AI, computer vision, and advanced financial modeling across the fintech, automotive, and agribusiness sectors. Adept at bridging the gap between complex algorithmic development—including Quantum Machine Learning methodologies—and high-impact business objectives.

PROFESSIONAL EXPERIENCE

XP Inc.

Data Scientist

São Paulo, Brazil

Oct 2025 – Present

- Architected predictive models and signal-generation algorithms to optimize conversion funnels, effectively boosting the ROI of targeted marketing campaigns.
- Developed and deployed Marketing Mix Models (MMM) to align complex behavioral data insights with long-term strategic growth roadmaps.
- Designed sophisticated B2B segmentation and financial profiling models, creating lead scoring frameworks that significantly optimized resource allocation for commercial and advisory teams.
- Engineered and implemented advanced personalized recommendation systems, driving a 45% increase in generated revenue compared to Business-As-Usual (BAU) baselines.
- Orchestrated model deployment pipelines utilizing Airflow DAGs with cron scheduling and Databricks Jobs, integrating MLflow for comprehensive lifecycle management and automated data drift detection.

BMW Group (BMW Bank)

Data Scientist

Munich, Germany

Feb 2025 – Jul 2025

- Designed and implemented predictive models to support risk analysis, customer behavior forecasting, and operational decision-making.
- Optimized MLOps pipelines and automated data processes, ensuring highly accurate, data-driven decision capabilities across multiple business units.
- Collaborated with cross-functional teams to align technical data solutions with broader automotive and financial strategic goals.

Edata Tecnologia

Data Scientist

Brazil

Sep 2024 – Feb 2025

- Managed the end-to-end data pipeline in an AWS environment, leading the optimization of distribution logistics based on predictive forecasts to achieve a proven 20% reduction in operational costs.
- Implemented a predictive machine learning solution for weight estimation in the agribusiness sector, achieving 92% accuracy and reducing estimation deviations by 35%.
- Built a Computer Vision system to identify sanitary anomalies, increasing the effectiveness of quality control by over 40%.
- Prototyped and integrated intelligent knowledge retrieval systems leveraging Generative AI, RAG architectures, LangChain, and LangGraph via robust FastAPI interfaces.

CNPq

Undergraduate Research Fellow

São Paulo, Brazil

Oct 2023 – Oct 2024

- Developed an interactive, Java-based application to teach core computer science algorithms, applying rigorous software engineering practices and architectural design.

EDUCATION & ACADEMIC PROGRAMS

CERN School of Computing (CSC 2026)

Selected participant for advanced high-performance computing and data science methodologies.

Liverpool, UK

2026

USP - Universidade de São Paulo

Master of Business Administration (MBA), Data Science

São Paulo, Brazil

Jan 2026 – Apr 2027

- **Thesis:** Optimization of Variational Quantum Circuits (VQC) compared to traditional Machine Learning utilizing Adam and SPSA optimizers.

Deggendorf Institute of Technology (THD)

Bachelor's Exchange Program, Artificial Intelligence

Deggendorf, Germany

Mar 2025 – Aug 2025

- **Thesis:** Utilized Vision Transformer (ViT) architecture for automated crack detection in industrial piping.

UNISAGRADO

B.Sc. Computer Science

Brazil

2022 – 2025

- **Thesis:** Developed a Deep Learning model to classify spine conditions from MRI scans, applying Transfer Learning utilizing EfficientNet and ResNet architectures.

TECHNICAL SKILLS & LANGUAGES

- **Core Competencies:** Predictive Modeling, Anomaly Detection, Graph Analysis, Generative AI, Computer Vision, MLOps, B2B Segmentation.
- **Languages & Frameworks:** Python, SQL, Java, Scikit-learn, Pandas, NumPy, Keras, TensorFlow, PyTorch, Hugging Face, FastAPI.
- **Big Data & Cloud:** AWS (S3, EC2, SageMaker, Lambda, Glue), Apache Spark, PySpark, Hadoop, Databricks, Airflow, MLflow.
- **Tools & Databases:** Neo4j, Tableau, Docker, Git/GitHub.
- **Languages:** Portuguese (Native), English (Fluent), Spanish (Intermediate), German (Beginner).
