PROFESSIONAL SUMMARY

Results-driven Data Scientist and Machine Learning Engineer with experience developing scalable predictive models, machine learning systems, and data-driven strategies across fintech, automotive finance, and agribusiness. Skilled in Python, SQL, cloud analytics, MLOps, computer vision, and generative AI, with a strong ability to translate complex modeling work into measurable business impact.

PROFESSIONAL EXPERIENCE

XP Inc.

São Paulo, Brazil

Data Scientist

Oct 2025 – Present

- Developed predictive models and signal-generation algorithms to optimize customer acquisition, conversion funnels, and targeted marketing campaigns.
- Designed B2B segmentation, financial profiling, and lead scoring models to improve lead qualification, commercial prioritization, and resource allocation.
- Deployed and monitored machine learning workflows using Airflow DAGs, Databricks Jobs, and MLflow, supporting lifecycle management.
- Translated behavioral data insights into strategic growth recommendations, aligning analytical outputs with long-term business objectives.

BMW Group – BMW Bank

Munich, Germany

Data Scientist

Feb 2025 – Jul 2025

- Assisted in designing and implementing predictive models to support financial risk analysis, customer behavior forecasting, and operational decision-making.
- Improved model performance through feature engineering, evaluation metrics, experimentation, and validation routines.
- Supported data pipeline automation and machine learning workflows, collaborating with cross-functional teams to align technical solutions with business priorities.

Edata Tecnologia

Brazil

Data Scientist

Sep 2024 – Feb 2025

- Designed predictive models to support logistics, production planning, and operational decision-making in agribusiness and food processing.
- Developed Python-based APIs with FastAPI to integrate machine learning models into operational systems and deliver real-time insights.
- Built computer vision models to detect poultry diseases and sanitary anomalies from image data, improving monitoring and early detection capabilities.
- Prototyped Retrieval-Augmented Generation and generative AI solutions using LangChain, LangGraph, and Pydantic for intelligent automation and knowledge retrieval.

CNPq – National Council for Scientific and Technological Development

São Paulo, Brazil

Undergraduate Research Fellow

Oct 2023 – Oct 2024

- Developed a Java-based educational application to teach core computer science algorithms to children through an accessible and interactive learning environment.
- Designed the software architecture, implemented algorithmic logic, and produced technical documentation to support project development and presentation.

EDUCATION & ACADEMIC PROGRAMS

CERN School of Computing (CSC 2026)

Liverpool, United Kingdom

Selected Participant – Advanced High-Performance Computing and Data Science Methodologies

2026

USP – Universidade de São Paulo

São Paulo, Brazil

Master of Business Administration (MBA), Data Science

Jan 2026 – Apr 2027

- Research focus: Optimization of Variational Quantum Circuits compared with traditional machine learning approaches using Adam and SPSA optimizers.

Deggendorf Institute of Technology (THD)

Deggendorf, Germany

Bachelor's Exchange Program, Artificial Intelligence

Mar 2025 – Aug 2025

- Academic project: Vision Transformer architecture for automated crack detection in industrial piping.

UNISAGRADO

Brazil

B.Sc. Computer Science

2022 – 2025

- Thesis: Deep learning model to classify spine conditions from MRI scans using transfer learning with EfficientNet and ResNet architectures.

TECHNICAL SKILLS & LANGUAGES

- **Core Competencies:** Predictive Modeling, Machine Learning, Growth Analytics, B2B Segmentation, Lead Scoring, Anomaly Detection, Graph Analysis, Generative AI, Computer Vision, MLOps.
- **Languages & Frameworks:** Python, SQL, Java, Scikit-learn, Pandas, NumPy, Keras, TensorFlow, PyTorch, Hugging Face, FastAPI, Pydantic.
- **Big Data & Cloud:** AWS, S3, EC2, SageMaker, Lambda, Glue, Apache Spark, PySpark, Hadoop, Databricks, Airflow, MLflow.
- **Tools & Databases:** Neo4j, Tableau, Docker, Git, GitHub.
- **Languages:** Portuguese – Native; English – Fluent; Spanish – Intermediate; German – Beginner.
